

Integrated_ai AI Search Optimization (AISO)

About Us

AI is rapidly becoming the first point of contact between customers and products. Today, [60% of Americans](#) use AI to find information online, making it necessary to prioritize AI marketing.

Our mission is simple: AISO will increase revenue from AI search.

What We Do

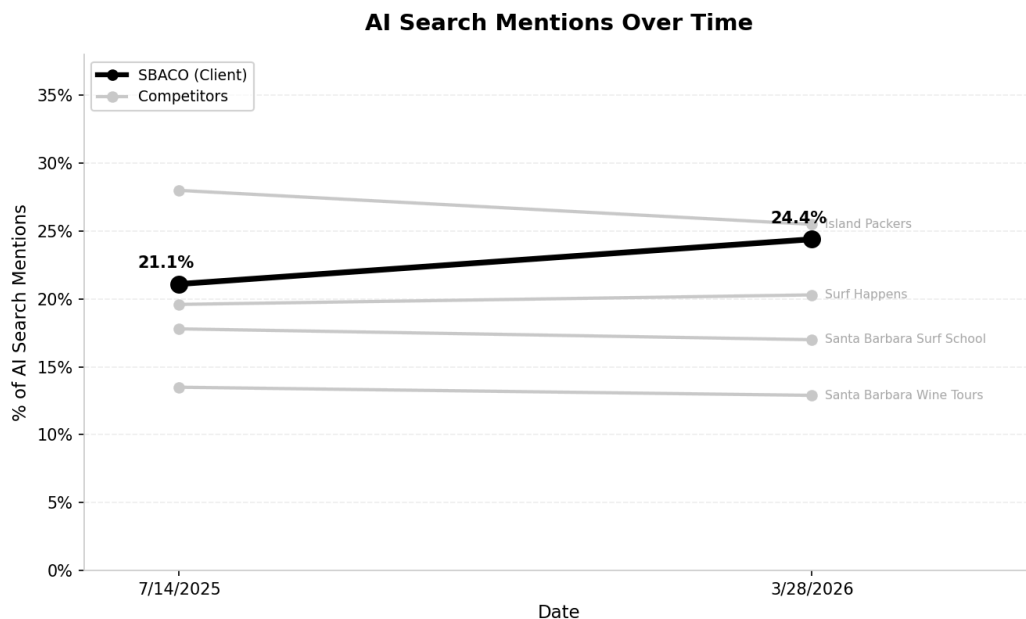

Integrated_ai software identifies where you and your competitors appear within AI search results.

AISO will map the networks AI uses to generate responses for your clients. We place your business inside the networks used in your industry.

Our Approach

We analyze how AI systems gather and prioritize marketing and advertising information. From there, we place your business into the networks that AI uses to recommend businesses in your industry.

Measurable Results

Change in number of AI search mentions over time with the use of AISO.

Why it Matters

Integrated AI gives your business an edge by building it into the systems that influence customer decisions. As AI shapes how people find products and services, we ensure your brand appears in front of your clients.
