Service Commitments

What we deliver and when.

CLIENT

START DATE

SECTION 1

Setup

Delivered within one week of signing.

Profiling

take the time to

We ~~sit down with you and~~ learn your business. What you offer, who you serve, where you operate, and what you want to be known for. This becomes the foundation of your presence in AI search.

Website File Implementation

Getting ~~into~~ AI search ^{*to find you easily*} requires specific files on your website. Backend access lets us ~~put them~~ ^{*bring AI*} there directly and update ~~them~~ ^{*it*} as needed. (No access? The files get sent over with instructions.)

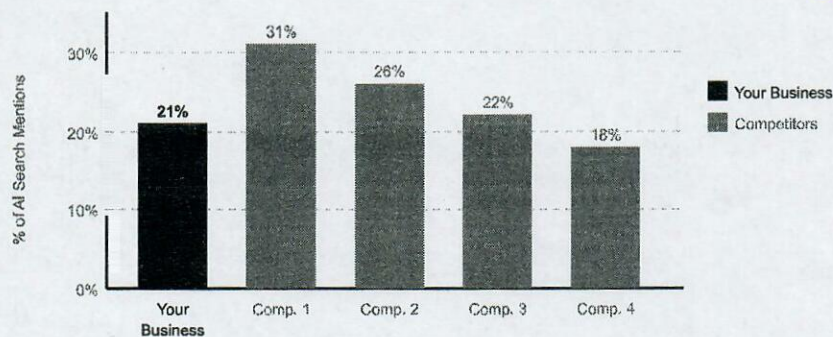

Focused Industry Assessment

Two charts measuring ~~how~~ ^{*how*} where your business stands in AI search right now. The first tracks how often your business comes up when AI answers questions in your industry, compared to your competitors. The second scores how positively your business is described when it does come up.

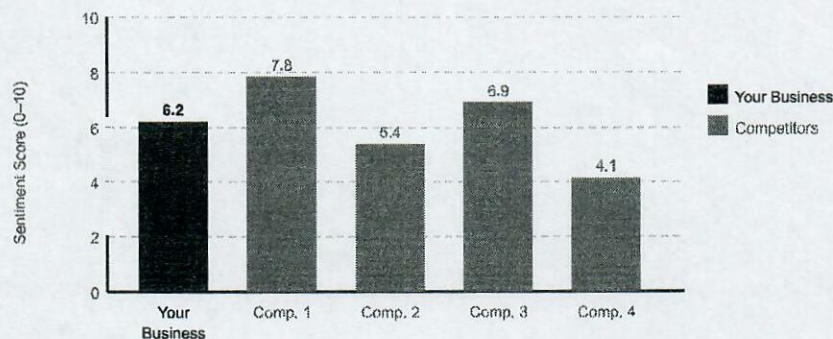

I don't understand your point here. Are you sending files to your

clients w/ directions?

AI SEARCH MENTIONS BY COMPANY

AI SEARCH SENTIMENT SCORE BY COMPANY

Example data. Your actual assessment reflects your industry and competitors.

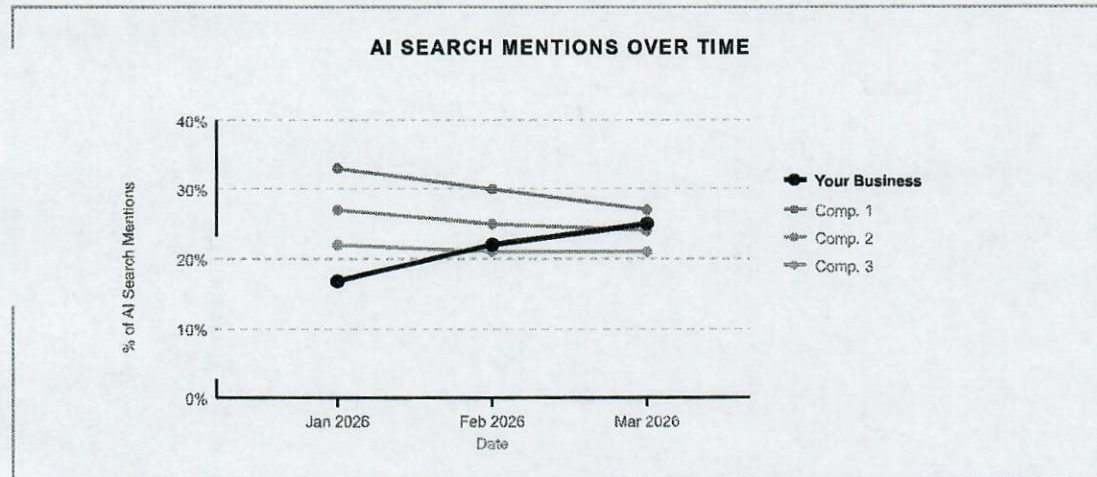

SECTION 2

Monthly Deliverables

Delivered every month following setup.

Evolving Industry Assessment

Your AI search mention rate is tracked over time, alongside your competitors. Each monthly delivery adds a new data point. The picture gets clearer every month.

Delivery 1: 2 snapshots · Delivery 2: 3 snapshots · Delivery 3: 4 snapshots · and so on.

Example data. Your actual report reflects your industry and competitors.

Directory Update Audit

A complete record of every directory and web path your business was added to that month, what was submitted to each one, and any updates made to your website files. Everything is documented.

Monthly Observations & Notes

Each month we will include a short written note with your report. We'll share what we are seeing in your space, what stands out, what changed, and anything worth your attention.

AI Search Optimization

Position your business where AI is already looking.

The Problem

60% of Americans now use AI to find information online.¹ If your business is not in those answers, you are not in the conversation.

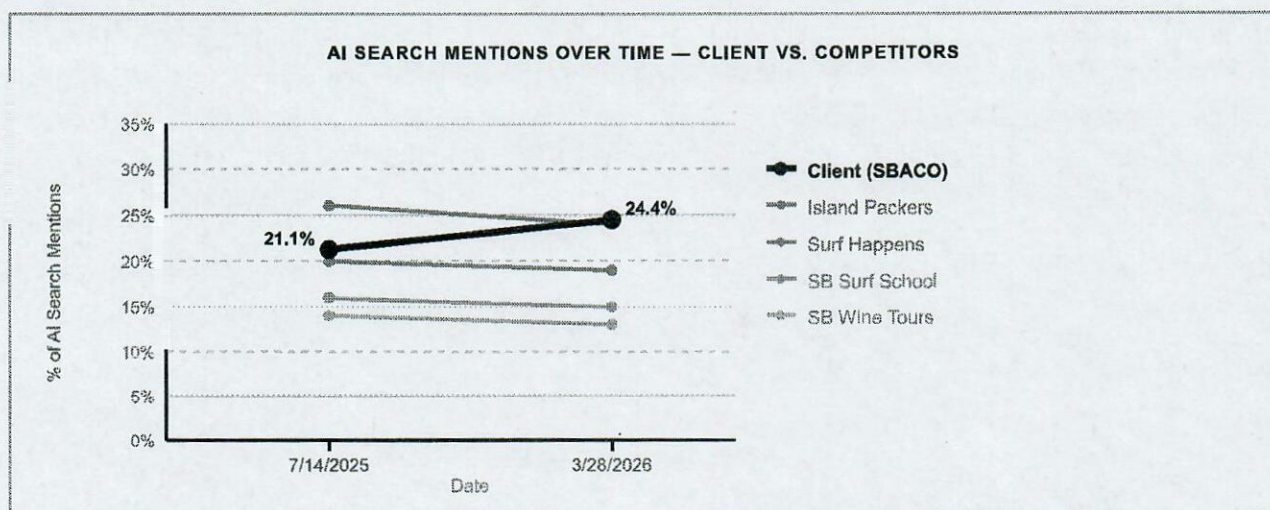

What We Do

We identify where you and your competitors appear within AI search results, map the networks AI uses to generate responses in your industry, and place your business inside them.

Where you appear, how often, and how positively. All of it tracked and improved every month.

Results

Real data from a current client in the Santa Barbara tourism industry, Santa Barbara Adventure Company (SBACO).

Santa Barbara tourism and activity space. Client gained 3.3 points. All four competitors declined.

Why it Matters

As AI shapes how people find products and services, your brand either appears in front of customers or it does not. The businesses built into these systems now have a direct advantage over the ones that are not.
